

PREGNANCY AND ALCOHOL DON'T MIX.

What we know:

- There's no known safe amount of alcohol use during pregnancy or while trying to get pregnant.
- · All types of alcohol are equally harmful, including all wines and beer.
- · Alcohol can cause problems for a developing baby throughout pregnancy, including before a woman knows she's pregnant.

What can happen:

• Drinking alcohol during pregnancy can cause miscarriage, stillbirth, and a range of lifelong physical, behavioral and intellectual disabilities. These disabilities are known as fetal alcohol spectrum disorders (FASDs).

What you can do:

- $\bullet \ FASDs \ are \ completely \ preventable \ if \ a \ woman \ does \ not \ drink \ alcohol \ during \ pregnancy.$
- For more information, visit www.cdc.gov/fasd or call 800-CDC-INFO.
